Quitting smoking isn't easy. It takes time. And a plan. You don’t have to stop smoking in one day. Start with day one. Let the Great American Smokeout event on November 21 be your day to start your journey toward a smoke-free life. You’ll be joining thousands of people who smoke across the country in taking an important step toward a healthier life and reducing your cancer risk. Plus, the American Cancer Society can help you access the resources and support you need to quit. https://www.cancer.org

**National Diabetes Month**

November is National Diabetes Month, a time when communities across the country team up to bring attention to diabetes. In partnership with the National Heart, Lung, and Blood Institute (NHLBI), this year's focus is on the link between diabetes and cardiovascular disease.

Adults with diabetes are nearly twice as likely to die from heart disease or stroke as people without diabetes. This is because over time, high blood glucose from diabetes can damage your blood vessels and the nerves that control your heart. The good news is that the steps you take to manage your diabetes can also help lower your chances of having heart disease or a stroke: 1) stop smoking or using tobacco products. 2) manage your A1C, blood pressure, and cholesterol levels. 3) Develop or maintain healthy lifestyle habits—be more physically active and learn ways to manage stress. 4) take medicines as prescribed by your doctor.
